11th International Annual Conference of the
Fertility Preservation Society (India)

**Navigating Fertility
Preservation:
Efficacy, Evidence,
Experience and Ethics**

Welcome Message

Dear Friends and Colleagues,

It is our pleasure to welcome you all to this global fertility preservation event organized by the Fertility Preservation Society (India). Fertility preservation plays a critical role in the lives of many young couples who are struggling with the possibility of current or future reproductive compromise. The ever-expanding horizon of fertility preservation encompasses young women and men with varying conditions – be it social or disease-related. The theme of this conference “Navigating Fertility Preservation: Efficacy, Evidence, Experience and Ethics” embodies this aspect of fertility preservation. We believe that Fertility Preservation is not only about cancer anymore. We have a diverse group of experts from various fields who will be sharing their expertise and research findings with us. We encourage gynaecologists, embryologists, oncologists, and reproductive medicine specialists to join us for this incredibly informative event.

The conference provides a unique opportunity to network and collaborate with peers and explore innovative solutions that will help patients in our own country. We welcome young investigators looking to share their research. Please mark your calendar for this exciting event!

We look forward to welcoming you to this conference at Hyderabad, and we wish you all a productive and enjoyable experience.

Thank you!
